Dear Polymath Network,

I first heard about Polymath Network around summer 2018 and was impressed with the idea of using Ethereum blockchain for security tokenization. I truly believe that eventually, all securities will be tokenized and thus Polymath Network plays an important role in this process. I would like to work for Polymath Network because I believe in its mission and the importance of it.

I've been involved in blockchain development since 2016 starting with creating bespoke Bitcoin payment processor, then apercoin.com (peer-to-peer crypto marketplace), and finally Ethereum dApp Coinpledge (productivity tool). I've written ERC20 tokens for ICO and crowdsale contracts. I am a full stack developer with web3/Solidity experience.

I hope my skills can be of use for Polymath Network to make ST-20 a golden standard for security tokens.

I am looking forward to hearing from you soon,
Igor Yalovoy.
